## SUMMARY

---

Full Stack Product Engineer with 4+ years of experience building production-ready applications, scalable frontend platforms, and enterprise design systems. Currently own and architect the company-wide design system at Datadrivers Oy; previously helped build component libraries at Metso that surpassed 100,000+ npm downloads across a global organization. Comfortable owning products end to end from Figma design to APIs, databases, and CI/CD and an early adopter of agentic AI engineering workflows (Claude Code, OpenCode, Azure OpenAI). Published author on AI-driven design systems.

## SKILLS

---

**Frontend:** React, TypeScript, JavaScript, Web Components, Storybook, Tailwind CSS, Next.js, HTML, CSS, Accessibility (WCAG), Design Tokens

**Backend:** NestJS, Node.js, PHP, REST APIs, Authentication & Permissions, PostgreSQL, MySQL

**DevOps & Tools:** Azure DevOps, GitHub, GitLab, CI/CD, Automated Testing, Figma, zeroHeight, JIRA, Confluence

**AI Engineering:** Agentic coding workflows, Claude Code, OpenCode, GitHub Copilot, Figma MCP, Azure OpenAI

## WORK EXPERIENCE

---

### Software Engineer / Design System / Product Development | [Datadrivers Oy](#) | [CAP-GROUP OY](#)

*Mar 2025 – Present | Helsinki*

Datadrivers Oy (part of CAP Group) builds large-scale digital platforms for driver training and logistics.

- Own and architect the enterprise design system used across multiple SaaS products, component architecture, theming, accessibility, testing, documentation, and adoption.
- Built and maintain a shared component platform with React, TypeScript, Tailwind, and Web Components, with accessibility and scalability as first-class requirements.
- Established frontend infrastructure, Storybook, design tokens, automated testing, and CI/CD workflows improving component quality and developer efficiency.
- Lead frontend R&D initiatives, author architecture decision records (ADRs), and guide technical direction for design-system evolution.
- Contribute across the stack: modern React applications and legacy PHP-based SaaS platforms serving thousands of customers.
- Drive adoption of agentic AI engineering workflows for prototyping, implementation, testing, and documentation.

**Tech:** *React, TypeScript, Tailwind, Web Components, Storybook, NestJS, PHP, PostgreSQL, Azure DevOps, GitLab, CI/CD*

### Software Engineer — Design System Team | [Metso](#)

*May 2023 – Jan 2025 | Espoo*

Metso is a global industrial technology company operating in more than 50 countries with 17,000+ employees.

- Developed and released reusable UI component libraries with 100,000+ npm downloads, enabling consistent UI patterns and faster product development across global product teams.
- Contributed to developing and scaling an enterprise design system supporting multiple product teams.
- Ensured quality and reliability through automated testing, versioning strategies, and brand and accessibility standards.
- Collaborated with designers, UX researchers, and engineers to align design and implementation across products.

**Tech:** *JavaScript, TypeScript, React, Web Components, Storybook, PHP, Node.js, Figma, zeroHeight, Azure DevOps, GitLab, CI/CD, Maze, JIRA, Confluence*

### Developer | [Nordevi Technologies](#)

*Aug 2022 – Mar 2023 | Helsinki*

- Delivered Nordevi Health, an EMR (Electronic Medical Records) application for dental clinics, end to end from design and development to production deployment and CI/CD as the responsible engineer.

- Designed and implemented various full stack: React/TypeScript frontend, Node.js backend, SQL database, and deployment pipelines.
- Delivered additional end-to-end frontend solutions and internal dashboards for international clients (Finland, Oman, Australia), operating independently from requirements through deployment and maintenance.
- Set up CI/CD pipelines and deployment workflows, reducing manual release overhead.

*Tech: React, TypeScript, Node.js, SQL, CI/CD, Cloud platforms*

### **Full Stack Developer Trainee Program | Integrify**

*Jan 2022 – Jun 2022 | Helsinki*

- Completed an intensive full-stack engineering program: React, TypeScript, Node.js, REST APIs, databases, testing, and Agile Git-based teamwork.

### **Software Developer Intern | Centria University of Applied Sciences**

*Jul 2021 – Dec 2021 | Finland*

- Contributed to web and software projects for internal stakeholders; early production experience in frontend, APIs, and documentation.

## **EDUCATION**

---

### **MSc, Information Technology (Software Engineering) | Åbo Akademi University**

*2023 – 2026 April | Finland*

### **BEng, Information Technology (Software Engineering) | Centria University of Applied Sciences**

*2017 – 2021 | Finland*

## **PUBLICATIONS**

---

*AI-Driven Design Systems: Enhancing Efficiency, Consistency, and Collaboration with Azure OpenAI : A Case Study of Modes( Metso Design System)*

## **CERTIFICATIONS**

---

Design Systems with Storybook v2 · React: Server-Side Rendering · React: Creating and Hosting a Full-Stack Site · Build REST APIs with FastAPI · Test Automation Foundations · AWS Cloud Practitioner Training (Integrify)

## **LANGUAGES**

---

English (Full Professional)
